2:27 PM

Conditions from Table 1.

a. Ca vs. BOLD:
communities

Disjoint Comparison: Dice Coeff

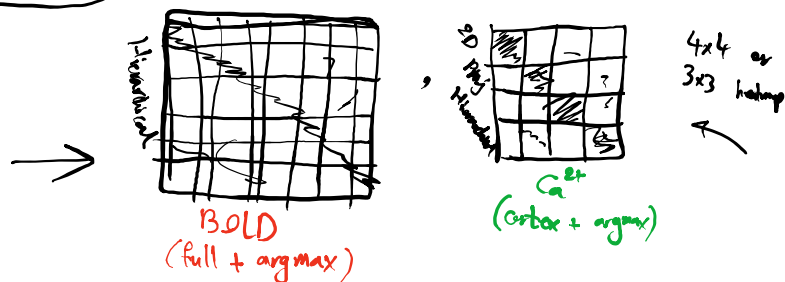

Overlapping Comparison: Cos similarity between membership vectors

b. Disjoint Comparison to Hierarchical (Ward's Linkage)

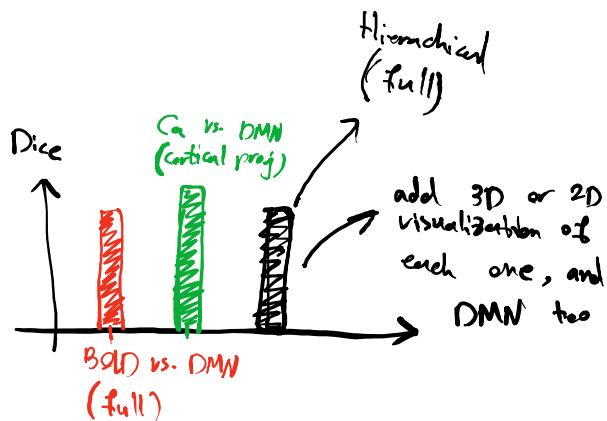

a 6 cluster result + its cortical projection

6x6 heatmap

c. Ca and BOLD:
disjoint comparison to others

DMN: mask published last year (Whitcell et Al.) using ICA

⇒ We recover existing results + (ICA, Agglomerative, stochastic + argmax) → same results
